2022 EXP 98

\$500,000

# Go Further. Stay Longer.

Set your sights on a lifetime of adventure and exploration with EXP 98. Built on the Isuzu NPR gas-powered chassis, EXP 98 is a joy to drive as you feel the pull from its 6.6L V8 pumping 425 pound-feet of torque.

Inside you'll be living comfortably and conveniently without worry from 960 amp hours of lithium ion power storage and a set of five Solbian roof-mounted solar panels totaling 800 watts of generation. An added recessed roof-mounted microwave packs additional space savings and convenience as you live your best life in the climate-controlled interior.

Taking a lot with you? You'll find ample storage under the bed and throughout the many drawers and cubbies inside the house. For larger items, there's pass-through storage and locker boxes on each side big enough for skis, coolers, and other bulky items.

EXP 98 is one of the finest examples of a pre-owned EXP we've seen, and the only one built on the Isuzu platform. After completing a full inspection and maintenance it's ready to provide unforgettable memories for decades to come.

# Features

---
