

EARTHCRUISER BSC (Base Camp)

BY **OVP**

OVERLAND VAN PROJECT

EarthCruiser BSC - by OVP

Compact Expedition Living.

EarthCruiser Base Camp is a strategic collaboration between EarthCruiser Innovation and Overland Van Project (OVP), combining decades of expedition vehicle experience with modern craftsmanship, refined comfort, proven reliability, and contemporary overland design.

EarthCruiser BSC - by OVP

Most People Grow Into This way of travel

We start with a tent, maybe a rooftop tent. Then a van or a truck camper. Each step brings more comfort, capability, and freedom. But life changes.

BSC is the next with out losing what is most important to you.

BSC was created for that moment you know compromise is for others

EarthCruiser BSC - by OVP

Built for Anywhere.

Together, EarthCruiser and OVP have created a compact expedition platform that blends serious off-road capability with the livability and functionality required for extended travel and remote exploration.

Built On Everything We Have Learned

EarthCruiser did not arrive from the van market or discover overlanding last year.

For years, we have helped people travel farther, stay longer, and explore with confidence.

Base Camp is not a departure from EarthCruiser. It is an evolution of the same expedition knowledge that created the EXP and the CORE platform.

EarthCruiser BSC - by OVP

More Time Exploring.

Less Time Compromising.

Nobody dreams about batteries, transfer cases, or water tanks. People dream about Alaska, Baja, the Yukon, remote mountain roads, desert campsites, and extraordinary places. BSC was designed so you can spend more time enjoying those moments and less time managing the logistics around them.

The Foundation Changes Everything
EarthCruiser starts with a purpose-built commercial expedition platform.

Proprietary EarthCruiser 4x4 system
Commercial-grade Isuzu platform
North American serviceability
Same CORE DNA as EarthCruiser EXP

EarthCruiser BSC - by OVP

Real-world performance. Not brochure claims.

Built For Those
Who Can't Afford
To Get Stuck

Before CORE became the foundation of expedition vehicles, it was engineered for severe-duty commercial applications where reliability is not optional.

A Different View Of The World For Everyone

The elevated cab-over driving position gives the driver a commanding view through a panoramic windshield.

You do not sit in traffic. You look over it. On trail, that visibility becomes confidence.

Available single or dual-cab

Forward-facing seats with structural belt anchorages. Optional upgrade seat and captain seats in the rear for a safe first class view.

EarthCruiser BSC - by OVP

Adventure Without Sacrifice
A comfortable bed. A warm shower. Heat when temperatures drop. Air conditioning when they rise. OVP brings the crafted living experience that makes extended travel genuinely enjoyable.

The image shows the interior of a modern, off-grid van. On the left, there is a bed with a white quilted blanket and two white pillows, positioned under two small rectangular windows. In the center, a white kitchen island features a black induction cooktop with two burners, a stainless steel sink, and a black faucet. To the right of the kitchen is a white cabinet with a microwave oven mounted on top and a refrigerator below it. Further right, there is a grey upholstered bench seat with a backrest, and in the foreground, a grey upholstered chair. The floor is made of light-colored wood. The overall design is clean, functional, and compact.

Off Grid Without Compromise

BSC is designed to remain comfortable long after the pavement disappears.

1000Ah Victron lithium power

1000W solar charging

5kW inverter

Hydronic heat and hot water

12V air conditioning

Starlink-ready integration

50-gallon freshwater capacity

EarthCruiser BSC - by OVP

When You've Outgrown The Van, But Not The Adventure

The van got you started.
It showed you what was possible.
Weekend escapes became longer journeys.
Campsites turned into remote tracks.
The farther you travelled, the more you discovered what mattered.
More water – capability – comfort – confidence.
But every van has its limits.
BSC is the next step.
Stay longer - explore further.
Discover the places that never make it into the guidebooks - best campsites aren't reserved.
